

Hello Fellow Members,

Hope you all are doing great, my name is Abhijit and I am new to this forum. I seek your expert guidance for a new venture which I have been planning to start from a very long time. As a beginner, I want to start a website like brainyquote or familyshare, where people can find quotes related to any topic, also where users can share articles, stories etc.

From last few years I have done a lot of research online and still doing, on what kind of website I should build and how i should market it via SEO, SMO, On/Off page optimization, link building, directory submission etc. I want to build a google friendly website but I don't want to spend a lot of money initially, ofcourse with time the spending will increase.

I have a job and can't devote all of my time to this venture initially. So it will be a great help if any of you can suggest me some good & reliable agencies, who can take care of my requirements without charging a lot of money, also feel free to give me more ideas/tips which you think can be more beneficial for this venture.

Positive or Negative - Any comments and suggestions are most welcome.

Thanks
Abhijit
